

## **Crop recommendations for Cabbage**

### **Transplants:**

Apply Vitazyme through drip irrigation at the rate of 1 liter/hectare (13-16 oz/acre) immediately before or after planting

or

Apply through transplant water at the rate of 1 liter/hectare (13-16 oz/acre)

### **After planting either through drip irrigation or foliar:**

Apply again approximately 30 days after planting at the rate of 1 liter/hectare (13-16 oz/acre).

Apply a third time approximately 60 days after planting at the rate of 1 liter/hectare(13-16 oz/acre) .

For storage cabbage apply a fourth time approximately 90 days from transplanting.

***Vitazyme can be tank mixed with all farm chemicals, including herbicides, insecticides, fungicides, and fertilizers.***

***Added benefit: when mixed with herbicide, Vitazyme will stimulate weed growth, thereby enhancing herbicide efficacy.***
