

## **Crop Recommendations for Carrots**

### **Planters with liquid applicators:**

Apply Vitazyme with liquid fertilizer either directly in the furrow or 2x2 at the rate of 1 liter/hectare (13-16 oz/acre).

### **Dry Planters:**

Apply Vitazyme with herbicide either before or after planting (either before or shortly after emergence) at the rate of (13-16 oz/acre).

Apply a second application of Vitazyme at approximately 30-45 days after planting at the rate of (13-16 oz/acre).

Apply a third application of Vitazyme approximately 60-70 days after planting at the rate of (13-16 oz/acre).

***Vitazyme can be tank mixed with all farm chemicals, including herbicides, insecticides, fungicides, and fertilizers.***

***Added benefit: when mixed with herbicide, Vitazyme will stimulate weed growth, thereby enhancing herbicide efficacy***
