

Crop Recommendations for Flowers

Container plants:

- Apply at the rate of 1 liter/hectare (13-16 oz/acre) or use a 1% solution to new transplants
- Apply at the rate of 1 liter/hectare (13-16 oz/acre) or use a 1% solution every 30-60 days, and each time the plants are moved to a larger container

Field grown plants:

- Perennials apply in early Spring at green up and approximately every 30 days thereafter at the rate of 1 liter/hectare (13-16 oz/acre) or use a 1% solution for small plots
- Annuals apply 1 liter/hectare (13-16 oz/acre) after seeding and approximately every 30 days thereafter at the rate of 1 liter/hectare (13-16 oz/acre) or use a 1% solution for small plots

Vitazyme can be tank mixed with all horticultural chemicals, including herbicides, insecticides, fungicides, and fertilizers.

Added benefit: when mixed with herbicide, Vitazyme will stimulate weed growth, thereby enhancing herbicide efficacy
