

Vitazyme Application Rates

New Plantings

Soak roots in a 1% solution or dip roots in a 5% solution before planting

Apply 1 pint/acre 3 more times during the growing season at approximately 30 day intervals

Vitazyme is compatible with all commonly used agri-chemicals and will not cause phytotoxicity.

Always mix Vitazyme with a regularly scheduled cover spray or herbicide application to avoid extra costs.

Established Vineyards

Apply Vitazyme 4 times through the growing season at 1 pint/acre:

1. At 3-6 inch growth or with herbicide
2. At early bloom
3. At BB size fruit
4. At verasion
