

Crop Recommendations for Onions

For Liquid Planters:

Apply Vitazyme at the rate of 1 liter/hectare (13-16 oz/acre) with in furrow drench

For Dry Planters:

With herbicide either before or after planting (either before or shortly after emergence) at the rate of 1 liter/hectare (13-16 oz/acre).

Apply a second time at the 3 leaf stage (approximately thirty days after planting) at the rate of 1 liter/hectare (13-16 oz/acre) with cover spray or through drip irrigation.

Apply a third time at the 6 leaf stage (approximately 60 days after planting) at the rate of 1 liter/hectare (13-16 oz/acre) with cover spray or through drip irrigation.

Extra size will be obtained if a 4th application at the rate of 1 liter/hectare (13-16 oz/acre) is made 2-3 weeks before the tops die down.

Vitazyme can be tank mixed with all farm chemicals, including herbicides, insecticides, fungicides, and fertilizers.

Added benefit: when mixed with herbicide, Vitazyme will stimulate weed growth, thereby enhancing herbicide efficacy.
