

## Crop Recommendations for Soybeans

Apply Vitazyme with herbicide either before or after planting (either before or shortly after emergence) at the rate of 1 liter/hectare (13-16 oz./acre)

or

Mix with inoculant and apply directly to the seed at the rate of 1 liter/hectare (13-16 oz./acre)

or

With glyphosate on Roundup Ready soybeans  
A second application is recommended approximately 30 days after planting at the rate of 1 liter/hectare 13-16 oz./acre).

***Vitazyme can be tank mixed with all farm chemicals, including herbicides, insecticides, fungicides, and fertilizers.***

***Added benefit: when mixed with herbicide, Vitazyme will stimulate weed growth, thereby enhancing herbicide efficacy.***
